Subject: PM Bioananlytical Study Status Spreadsheet

Sensitivity: Confidential

PM Tracking.xls (74 KB)

Attached is the updated PM study spreadsheet (June 23, 2003). Any new additions or changes to the spreadsheet are in red (if you have a color printer available). Dates in the Database lock column (DB Lock) are projected and once the lock is completed and a stats dump has been performed the cell is highlighted . When the analysis of a group is complete and the Bioanalytical Report (not PK) is mailed to Philip Morris, "Complete" is entered into the status column.
